Subject: Work Plan for next sampling event at Tower Standard

Hello All, REI has been approved to sample the monitoring well network at Tower Standard. Attached is a brief work plan outlining the proposed work. The intent is to sample the wells in a manner consistent with previous sampling events. Wells are to be sampled for PVOC and naphthalene compounds and dissolved lead at sample locations MW17, MW17@31-36, MW20, MW20@20-25, MW21 and MW22.

Field work would not begin prior to February 20, 2016 and REI will monitor the local weather before deciding on a sampling date. With regard to access to the Kozak property for Tribal oversight of the proposed well sampling, permission is granted as long as the Tribal members are

accompanied by REI personnel.

Please let me know if you have any questions or concerns.

Thank you,

David N. Larsen P.G

Hydrogeologist / Professional Geologist
